

The Sustainable Landscapes programme

In partnership with Anglian Water

The benefits for your farm

- ✓ Free cover crop and functional field margin seed for upto 10 hectares.
- ✓ Learn about sustainability with profit in mind
- ✓ Hear from local farmers and experts
- ✓ Fully catered free events
- ✓ Find out what practices work in your local area
- ✓ Social groups for sharing knowledge
- ✓ New technologies, agronomy, analysis & soil advice
- ✓ No cost of involvement - just your time & interest
- ✓ Innovative Agri-Tech to trial on farm

Sustainable Landscapes

Adapting to a changing world.

In 2024 we partnered with Anglian Water to launch the programme in North Lincolnshire to promote cultural change in broadacre farming.

We offer **practical, independent advice to improve soil health, increase profitability, protect water quality, and reduce emissions**, collaborating with universities and local partners to bring expert guidance directly to farmers.

By spring 2025, the programme had engaged over **25,000 hectares of arable land**, supporting farmers in adopting climate-smart practices that enhance soil, reduce nutrient leaching, and build long-term environmental and economic resilience.
